Dear Mr. Weiss:

In the letter we received with the Pratt and Whitney Revised Part B application dated November 13, 1990, several dates were mentioned for the submittal of additional information needed to complete certain sections of the application for both the existing and the proposed storage buildings. Upon review of these dates we feel that the majority of the information should be submitted earlier than is anticipated from your letter. In addition, it is only necessary to submit the Part B permit application for the proposed storage building. It is not necessary to submit a Part B permit application for the existing storage buildings. Please submit all information, except for plans and specifications, for the new storage area on or before January 3, 1991. Since the focus of the permit review process will be for the proposed storage building, a revised complete Closure Plan should be submitted for all the existing storage buildings that will not be used for greater than 90 day storage of hazardous waste in the future.

The revised Part B permit application should at a minimum include the following revisions. Information from the reevaluation of the barrel management practice is more pertinent to Process Information than to the Contingency Plan. Therefore, these sections should be updated. In regards to the Waste Analysis Plan, we feel that Pratt and Whitney should be able to provide a revised Waste Analysis Plan earlier than January 31, 1991. This information should include the separation of chemicals by Reactivity Group Numbers (RGN) and their Hazard Identification Numbers for Flammability, Reactivity, and Health in accordance with NFPA requirements. This information should be submitted to the Department of Environmental Protection by January 3, 1991, along with the revisions for the Pratt and Whitney Training Program.

page two

In summary, the revisions for the Contingency Plan, Process Information, the Waste Analysis Plan, Personnel Training, Closure, and all other information pertaining to the new storage building or any existing storage buildings that will need to be permitted should be received by January 3, 1991. If you have any questions, please contact Lynn M. Clune at (203) 566-4869.

Sincerely,

David A. Nash
